

**JAMES COOK
UNIVERSITY**
AUSTRALIA

Creating a Brighter Future

Be part of the innovation, translation and capacity development in Tropical Health and Medicine at James Cook University.

To complement the research endeavours in tropical health and medicine at JCU through Australian Institute of Tropical Health and Medicine (AITHM) and Centres, the College of Public Health, Medical and Veterinary Sciences has designed these critical roles to support research transition into policy and programmes and to build the capacity of public health professionals in the tropics to adapt, implement and evaluate disease control programmes and innovations.

Based on the tropical Townsville campus, now available are two exciting opportunities;

- Head of Academic Group and Senior Lecturer/Associate Professor, Communicable Disease Control and Tropical Medicine
- Lecturer, Public Health and Tropical Medicine

JCU offers an inclusive working environment with opportunities for professional and personal growth surrounded by modern facilities and the best of the north Queensland environment. Achieving a balance of work and life, you can enjoy a relaxed lifestyle in a coastal community that provides a diverse range of opportunities and amenities.

To learn what the JCU tropical strategy can do for you visit our website – the possibilities are endless.

Applications close: 13 November 2016
